Good morning Robert,

Attached are some photos of the MB cylinder that has been seized from Terminix on St. Croix in the USVI. It shows label info and dimensions of the cyl. It has been weighed and comes in at 52 lbs, so minus a tare weight I'm guessing the cylinder is almost empty. I have more images, including a scale drawing of the cyl dimensions, and I'll send you in a few minutes. Arrangements for sampling the cyl are still pending, but what I'd like to get from you is the procedure for returning the cylinder to one of your Mainland facilities. Great Lakes is sending us a special overpack drum for their cylinder, as well as the prepaid shipping papers, but when you and I spoke you indicated that your cylinder did not require any overpackaging to ship it. We'd like to have all the shipping arrangements in place so that once sampling is complete we can move the cylinder directly to the dock to have it shipped.

Thanks,

Paul Kahn
